AB Spun synthetic fibers finished with lubricant compns. contg. a fluorocarbon and a cationic ***surfactant*** and drawn are soil-resistant and have good dyeability. Thus, nylon 6 was melt spun and coated (15%) with 10% lubricant ***emulsion*** contg. 7% 70:25:3:2 CH₂:CHCO₂CH₂CH₂(CF₂)₆CF(CF₃)₂-vinyl chloride-2-chloroethyl vinyl ether-2-hydroxyethyl ***acrylate*** copolymer [***90571-06-5***] and 1% dodecyltrimethylammonium chloride [112-00-5]. The coated fibers were drawn 250% at 90.degree. and heat-treated 1 s at 150.degree., and a woven fabric was prepd. and dyed with a liquor contg. 2% (on fiber wt.) Nylomine Blue AG for 20 min at 80.degree. to give a water-resistant soil-resistant fabric with good color yield.
